

Claim Listing:

Claims 1-20 (cancelled).

21. (new) A novelty kit for aiding a person seeking to attract attention at socially interactive events comprising:

(a) at least one flexible frameless eye patch with an aperture therein sufficient to enable said person seeking to attract attention to see through the aperture, and with a first adhesive layer on a first side of said flexible frameless eye patch for affixing said flexible frameless eye patch to said person's face and having a second adhesive layer opposite said first layer on a second side of said flexible frameless eye patch adjacent said aperture for supporting an optical element upon said flexible frameless eye patch; and

(b) wherein said kit includes instructions directing said person to

(b-1) print an attention getting message on a receptor sheet;

(b-2) mount said receptor sheet upon the second adhesive layer on the second side of said flexible frameless eye patch; and

(b-3) press said first adhesive layer against said person's face.

22. (new) A kit for enabling a person to refrain from wearing conventional eyeglasses in socially interactive settings and yet retain reasonably good visual perception in said socially interactive settings comprising:

(a) at least one mask-like member to be worn by said person, with an aperture therein of a size sufficient to enable said person to see through the aperture and with said mask-like member having first means for affixing said mask-like member to said

person's face and having second means for enabling a corrective lens made from an outdated prescription to be supported upon said mask-like member and over said aperture; and

(b) wherein said kit includes instructions directing said person to mount said corrective lens from an outdated prescription upon said mask-like member and over said aperture.

23. (new) The kit of claim 22 wherein said instructions direct said person to print a message upon said mask-like member for enhancing social interaction.

24. (new) The kit of claim 22 wherein said second means comprises an adhesive layer.

25. (new) The kit of claim 24 wherein said instructions direct said person to print a message upon a sheet and attach the sheet to said adhesive layer for enhancing social interaction by functioning as a conversation piece.

26. (new) The kit of claim 22 wherein said first means comprises an adhesive layer.

27. (new) The kit of claim 23 wherein said first means comprises an adhesive layer.

28. (new) The kit of claim 24 wherein said first means comprises an adhesive layer.

29. (new) The kit of claim 22 wherein said mask-like member is brightly colored to attract attention.

30. (new) The kit of claim 23 wherein said mask-like member is brightly colored to attract attention.

31. (new) The method of claim 24 wherein said mask-like member is brightly colored to attract attention.

32. (new) The method of claim 25 wherein said flexible eye patch is brightly colored to attract attention.

33. (new) A kit for enabling a person to refrain from wearing conventional eyeglasses in socially interactive settings and yet retain reasonably good visual perception in said socially interactive settings comprising:

(a) at least one flexible mask-like eye patch with an aperture therein of a size sufficient to enable said person to see through the aperture and with a first adhesive layer on a first side of said flexible eye patch for affixing said flexible eye patch to said person's face and having a second adhesive layer on a second side of said flexible eye patch adjacent said aperture; and

(b) wherein said kit includes instructions directing said person to press a previously used corrective lens made from an outdated prescription against the second adhesive layer of said flexible eye patch to mount said corrective lens thereon, and to press said first adhesive layer against said person's face.

34. (new) The kit of claim 33 wherein said instructions direct said person to take the step of recording a message upon the second side of said flexible eye patch that enhances social interaction by functioning as a conversation piece.

35. (new) The kit of claim 34 wherein the step of recording a message includes printing the message on a sheet that is attached to portions of said flexible eye patch bearing said second adhesive layer.

36. (new) The kit of claim 33 wherein said flexible eye patch is brightly colored to attract attention.

37. (new) The kit of claim 34 wherein said flexible eye patch is brightly colored to attract attention.

38. (new) The kit of claim 35 wherein said flexible eye patch is brightly colored to attract attention.

39. (new) The method of claim 27 wherein said mask-like member is brightly colored to attract attention.

40. (new) The method of claim 28 wherein said mask-like member is brightly colored to attract attention.
